

In 1996, we rented a factory and started to process dehydrated garlic flakes. In 1999, we established our first factory and started to supply our products to domestic traders. In 2007, we established our second factory named Shandong Xinnuo Food Development Co., Ltd., which has the right to import and export by our own and started to supply foreign customers. As the business continued to expand, the production capacity of the original factory could not meet the needs of customers. In 2014, we established a modern factory called Shandong Xinnuo Food Technology Co., Ltd.

Which is a leading modern production enterprise integrating planting, storage, processing, research and development, import and export trade. The main products are spices, condiments, black garlic, beverages and other products. Our new company has a registered capital of 70 million yuan and covers an area of 49,180 square meters. It currently has an office building of 3,800 square meters and an experimental research and development room of 500 square meters. Our new factory has a construction area of 70,000 square meters, 17 production lines, 8 storage warehouses, and 10 constant temperature cold storages (4,600 square meters). The annual production capacity reaches 91,600 tons.

Our company uses advanced technology, precise American imported equipment, and precise German imported equipment to accurately control technology and quality, and strive for excellence. It can better reduce manual operations, simplify cumbersome processes, improve production efficiency, and stabilize product quality. We have our own R&D laboratory, multiple and timely testing, survive by quality, and strictly control quality.

OWN PLANTING BASES

Garlic Planting Base

Jinxiang County is a famous hometown of garlic in China. The history of garlic cultivation has reached more than 2,000 years, with 700,000 mu of garlic planted all the year round, and its products are exported to more than 160 countries and regions. Jinxiang garlic has the obvious advantages of big garlic, strong flavor of juice, pure spicy taste, crisp and delicious taste, no loose petals, mildew resistance, rot resistance and storage resistance.

Chili/Pepper/Paprika Planting Base

We have established our own chili planting base in one of China's prime chili-growing regions. Through scientific farming practices and strict control over pesticide use and soil management, we ensure that our chili peppers are natural, safe, and rich in authentic heat. The entire process—from seed selection and seedling cultivation to harvest—is traceable, guaranteeing stable quality and a reliable raw material supply for our chili sauces and seasoning production.

Ginger Planting Base

We have established our own ginger planting base in a premium ginger-growing region, leveraging natural ecological advantages and adopting eco-friendly farming methods. Residue levels and heavy metal content are strictly controlled throughout the planting process. From seed rhizomes and field management to harvesting, cleaning, and storage, every step is fully traceable to ensure the ginger is natural, safe, and of premium quality. The base provides a stable and controllable supply of raw ginger for our product lines including ginger powder, ginger paste, condiments, and beverages.

Onion Planting Base

We have established our own onion Planting base in one of China's premium onion-growing regions. The base cultivates multiple varieties including red, yellow, and sweet onions. All farming practices follow green agriculture standards, avoiding harmful pesticides and fertilizers to ensure natural, healthy, and uncontaminated onions. From seedling cultivation and field management to harvesting, grading, pre-cooling, and storage, every step is fully traceable. This guarantees a stable and high-quality supply of raw onions for our dehydrated onion, onion powder, seasoning paste, and other processed products.

Tomato Planting Base

We have established our own tomato planting base in regions with abundant sunlight and clean water sources. We carefully select high-solid, rich-flavor tomato varieties ideal for processing. The cultivation follows green agricultural standards with strict control over pesticide residues and heavy metals in the soil. From seedling development and planting to harvesting, sorting, and storage, every stage is fully traceable to ensure freshness and safety. Tomatoes from our base are widely used in the production of tomato paste, seasoning sauces, dehydrated tomatoes, and other processed tomato products.

Sauce/Paste Series

XINNUO
FOOD

01

Fresh garlic paste is made from fresh garlic without any preservatives, preserving the natural aroma and nutrition of garlic. It's smooth texture allows it to easily blend into various dishes, making it an ideal choice for delicious garlic dishes like garlic broccoli and garlic seafood. Simple and healthy, it adds flavor to home-cooked meals.

Fresh Ginger Paste 230g

Our premium Fresh Ginger Paste is made from high-quality fresh ginger, carefully processed to retain the natural aroma and spiciness of ginger. No preservatives are added, ensuring the purity and integrity of the food. This paste is particularly suitable for dishes that require the flavor of ginger or want to eliminate any unwanted odor, enhancing the taste of dishes such as steamed fish or ginger-flavored meat slices. Easy to use and versatile, our Ginger Paste is an ideal choice for elevating your cooking.

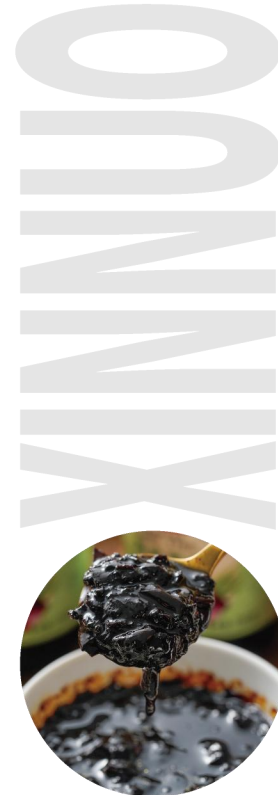

Fresh Garlic Chili Paste 230g

Our Garlic Chili Paste is a unique seasoning that blends the rich aroma of fresh garlic with the intense spiciness of locally sourced chili peppers. This versatile paste pairs perfectly with various spicy dishes such as chili-stir-fried meat and garlic-spiced chicken wings. We are committed to using carefully selected high-quality ingredients and special techniques to maintain the freshness of garlic and the heat of chili, providing double the enjoyment for those who love spicy flavors. Additionally, we promise not to add any preservatives, ensuring the naturalness and healthiness of the product, allowing you to enjoy its deliciousness.

Fresh Jalapeno Chili Paste 230g

This Jalapeno chili paste is made using fresh chill peppers from Jalapeno chilies as the main ingredient, finely ground and blended. It captures the unique aroma and spiciness of Jalapeno chilies perfectly, making it an ideal choice for those who love spicy food. This paste is easy to use and can be easily paired with a variety of dishes as a marinade for barbecues or as a seasoning on everyday dining tables, enhancing the spiciness of dishes. No preservatives are added, ensuring the naturalness and healthiness of the paste, allowing you to enjoy delicious dishes with peace of mind.

Shanghai flavor Scallion Oil

190g

Our Shanghai Style Scallion Oil uses fragrant shallots, stir-fried at low temperatures to extract the maximum umami flavor. Blended with a hint of sesame oil, it has a rich yet light taste. No preservatives are added, preserving the original flavor of the ingredients. Simply add to chicken, stir-fry, soup and other dishes to significantly enhance the flavor. This elegant, delicious and healthy seasoning meets the Japanese market's demand for high-quality seasonings, adding a deep taste and aroma to every dish.

Zero-fat Chili sauce

190g

You can eat for weight loss and fitness, and you are not afraid of being fat. Made of pure pepper, it is not greasy but super delicious, and it is a must to mix noodles and bibimbap. With jiaozi, stir-fry, dip in chicken breast, whatever you eat is delicious. Oil-free formula, refreshing to eat, no burden on the stomach.

Red Onion Paste

190g

The vibrant aroma of our red onion paste is made using carefully selected red onions, ensuring the purity and safety of the food without the use of chemical additives. Its rich natural aroma and flavor pair especially well with noodles and rice, instantly enhancing the flavor of your dishes. While preserving traditional techniques, we offer you an ideal paste for your healthy meals, adding an irreplaceable flavor to your table.

Duck Egg Yolk Sauce

130g

Duck egg yolk sauce is a unique and delicious condiment made from rich duck egg yolks that have been carefully prepared. This sauce, with its aromatic and flavorful qualities, is particularly suitable as an accompaniment to various dishes, such as cold dishes, stir-fried spreads for bread or crackers, adding a unique flavor. We promise not to add any preservatives, keeping all duck egg yolk sauces in a pure and natural state. Enjoy the deliciousness with peace of mind and good health.

Tomato Passata

Made with Sun-Ripened tomatoes handpicked origin in Northwest of China. Elevate weeknight dinners—just heat & toss with pasta (al dente recommended), or use as a pizza base, bruschetta topping, or shakshuka base. Non-GMO, gluten-free, and vegan-friendly (no dairy traces). Sterilized glass jar packaging (BPA-free), retains nutrients like lycopene ($\geq 3\text{mg}$ per serving). (Customizable with organic/SPG-free/low-sodium as needed.)

Black Truffle Paste

Exquisite raw material: Carefully selected wild black truffles (*Tuber melanosporum*) from the forests of Northern Yunnan Province China, rich and aromatic, blended with extra virgin olive oil and natural sea salt—every spoonful is a gift from nature. Versatile Pairing: Elevate everyday meals in seconds—toss with pasta, spread on baguettes, pair with steak, or enhance steamed eggs, instantly adding gourmet sophistication.

Sweet Vinegar Pickled Garlic

Sweet Vinegar Pickled Garlic is a sweet and sour refreshing pickled garlic. Fresh garlic is soaked in a special sweet vinegar liquid, the spicy taste is alleviated, while retaining the original nutrition of garlic. It is suitable as a side dish for various dishes such as barbecue and sushi, adding a refreshing flavor.

Pickled Fermented Garlic in Vinegar

Pickled Fermented Garlic in Vinegar is a unique type of garlic that turns green naturally after being soaked and fermented in vinegar. It is called "Laba Garlic" because it is made on the day of the traditional Chinese festival "Laba Festival". During the low-temperature fermentation process, the spicy taste is suppressed and the sour taste is more prominent. It is often used as a side dish for dishes such as dumplings and stews, and is very popular.

Salted Garlic

Salted garlic is made by salting with brine or dry salt, which suppresses the spiciness of garlic and makes its flavor milder. At the same time, the preservation is improved, suitable for a variety of dishes. It can be eaten directly, or used in stews, barbecues, meat marinades, etc. to add depth and aroma to dishes.

Spicy Pickled Garlic

Spicy Pickled Garlic is a processed garlic food made by pickling with a variety of spices and seasonings, with rich flavor and deep taste. Adding spices such as bay leaves, black pepper, chili peppers, cloves, etc., makes the unique spicy taste of garlic alleviated and exudes an attractive aroma. It can be eaten directly or used as a condiment for meat dishes, pasta, and kimchi to add flavor.

Black Garlic

Black garlic is made by fermenting fresh garlic. Originally used as a medicine, it has been widely used in various Asian cuisines for centuries. The fermentation process of black garlic takes weeks or even months to age the garlic bulbs and form the final product. At the same time, in order to maintain its sticky consistency, the temperature and humidity are strictly controlled.

Peeled Black Garlic single-clove

Peeled black garlic is easy to use and is peeled by a pollution-free fully automated machine, preserving the original flavor to the maximum extent. It is excellent when eaten with salads, soups, stir-fries and other dishes.

Peeled Black Garlic Multi-cloves

Peeled black garlic is easy to use and is peeled by a pollution-free fully automated machine, preserving the original flavor to the maximum extent. It is excellent when eaten with salads, soups, stir-fries and other dishes.

Black Garlic Powder

Black garlic powder does not contain any food additives and is made entirely from ground black garlic. Our black garlic powder retains the unique flavor of black garlic, bringing a unique taste to dishes. Adding black garlic powder to salads, soups, stir-fries and other dishes can produce a wonderful taste.

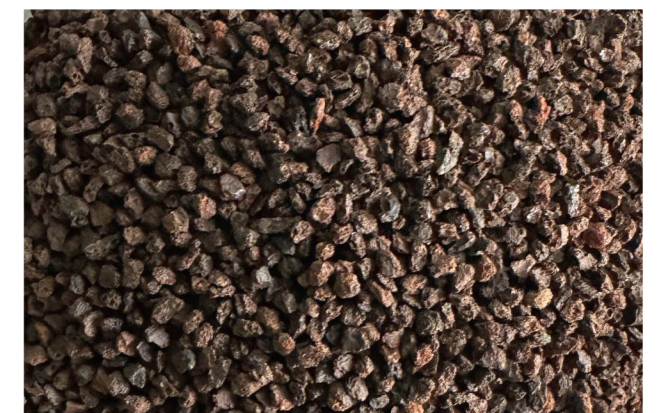

Black Garlic paste

Made of high-quality black garlic, it tastes fragrant and smooth, sweet and sour, and is rich in natural nutrition of black garlic. Open the lid and eat immediately, or dip, mix and stir-fry, giving the dishes a unique flavor. It is an indispensable new healthy seasoning choice for families and restaurants, with low fat and no burden, and eating more at ease.

Black Garlic Granules

Black garlic Granules does not contain any food additives and is made entirely from ground black garlic. Our black garlic granules retains the unique flavor of black garlic, bringing a unique taste to dishes. Adding black garlic granules to salads, soups, stir-fries and other dishes can produce a wonderful taste.

Probiotic fermented ginger juice

230ml

Ginger beer (Low Sugar) is made with the world's leading physical cold-pressed juice extraction technology and advanced probiotic fermentation processing technology, effectively retaining the ingredients and efficacy of ginger. It is healthier and more delicious, comparable to ginger ale on the market.

Pomelo & Grapefruit Juice

300ml

Pomelo & grapefruit juice retains the natural flavor and uses imported grapefruit & Pomelo. It contains no protein and fat in nutrition and is a rare and delicious drink that does not cause weight gain. It is especially suitable for people who exercise and lose weight. It is rich in vitamin C, vitamin B2, etc., and can also supplement the trace elements such as calcium, potassium, phosphorus, etc. required by the human body. After sterilization, it tastes better. Zero fat, no additives such as pigments and flavorings.

Prune Juice

300ml

Prune juice has a unique aroma and a smooth taste. It not only has a unique sweet aroma, but more importantly, prunes contain cellulose, vitamin A, vitamin C, potassium, iron, calcium, folic acid and other nutrients needed by the human body, and are fat-free and cholesterol-free. Prunes can help the human body, especially children and the elderly, supplement iron, zinc, magnesium, potassium, strengthen the body, and promote children's bone and muscle growth. In addition, it is fat-free and does not contain additives such as

Lychee Juice

300ml

The juice is made by boiling natural Lychee fruits in sequence, which retains the nutrition of the fruits to the maximum extent. Lychee can promote the secretion of saliva and body fluids and nourish the skin. The combination of tamarind and lychee brings a fresh taste and is delicious. Zero fat, no additives such as coloring and flavoring.

Gojiberry Juice

300ml

Gojiberry has a long history as a medicine and food in China and is a precious Asian ingredient. It has anti-aging and anti-aging effects. The wolfberries picked from Qinghai Province contain a variety of amino acids, beanie, zeaxanthin and other special nutrients, which are healthy and beneficial. The rich foam and flavor of gojiberry juice are suitable for consumers of all ages. Zero fat, no additives such as coloring and flavoring.

Plum Juice 300ml

Plum juice was a daily drink in the ancient Chinese court. Drinking plum juice can eliminate the greasy feeling after eating high-calorie greasy food. Plum juice is rich in nutrients such as organic acid, citric acid, vitamin B2, crude fiber, etc. Both the raw materials and the production process are zero fat, and do not contain additives such as pigments and flavorings.

Sea Buckthorn Juice 300ml

Small wild seabuckthorn produced in Inner Mongolia was selected. Seabuckthorn is beneficial to the skin, and its vitamin C content is extremely high, so it is known as the "king of vitamins". At the same time, the content of vitamin E is also high, and it also contains B12, carotenoids, flavonoids and fatty acids. Seabuckthorn is a good source of vitamin C. Seabuckthorn juice made from wild seabuckthorn has better taste, richer foam and stronger bactericidal effect. Zero fat, no additives such as pigments and flavorings.

Hawthorn Juice 300ml

Selected high-quality hawthorn freshly squeezed, 0 added pigment essence, the original fruit is sweet and sour. A bottle after a meal will promote digestion and make it more comfortable. It is a good partner for gathering hot pot. Healthier than carbonated drinks, moderately sweet and sour, not afraid of obesity. Cold and refreshing, heating and warming the stomach, can be drunk in all seasons. Appetizing and nutritious, children and the elderly like it.

Waxberry Juice 300ml

Waxberry juice is slightly sweet and sour, delicious. It can increase appetite, and a sip can also bring beauty effects. It contains a high amount of antioxidants, which can neutralize free radicals in the human body and slow down the aging process. Bayberry juice has a good effect on the blood. It is rich in vitamin C and iron, which can promote blood circulation and metabolism, enhance immunity, and prevent anemia. It does not contain additives such as pigments and flavorings.
