

ENJOY WONDERFUL LIFE

WANSHIDA COFFEE MACHINE (HANGZHOU) CO., LTD

Company Profile

Established in 2006, Wanshida Coffee Machine (Hangzhou) Co., Ltd. is an international coffee machine manufacturer integrating R&D, production, sales and service, and also one of the few Chinese coffee machine manufacturers with independent Chinese intellectual property rights. As a Chinese high-tech enterprise, Wanshida masters nearly 30 internationally leading patented technologies. Our factory has passed the standard of management systems ISO9001:2015, ISO14001:2015 and the TUV factory audit. Our brand "JAVA|Dingrui" coffee machines are sold in more than 50 countries and regions including Europe, America and the Middle East...and have been widely recognized by customers.

Based on self-innovation, Wanshida introduces and learns from first-class production and management experience, gathers high-level talents to build the most professional and high-quality coffee machine in China. To our great honor, the JAVA Fully Automatic Coffee Machine was appointed to serve the 2014 Beijing APEC Summit, the 2016 G20/B20 Hangzhou Summit, the 2017 BRICS Summit in Xiamen, and the 2018 SCO Qingdao Summit. Wanshida participated in the CIIE for four consecutive years and received great attention from major media including CCTV.

With the further maturity and application of new technologies such as 5G and VR/AR, Wanshida Coffee Machine have begun to deploy smart products. In addition to traditional home espresso machines, JAVA fully-auto coffee vending machines, which represent products and technologies in the field of intelligent manufacturing, have also entered the market smoothly. JAVA fully-auto coffee vending machines build unmanned coffee consumption scenarios driven by the SaaS system, which are suitable for commercial scenarios such as offices, convenience stores, hotels, airports, and gas stations.

2020, Wanshida takes the establishment of JAVA Coffee Culture Industrial Park as the focus of enterprise development strategy. It will be built into a comprehensive industrial service platform which integrates equipment R & D and manufacturing, coffee industry design center, coffee machine experiment center, product display, coffee business school and coffee museum.

YOUR AUTO-COFFEE SHOP

Explore more possibilities of smart vending coffee machine. With our Java Vending Cloud System solution, you can manage and monitor your coffee machine remotely from your office with this additional option.

It optimizes your service processes and increases sales opportunities. Java Vending Cloud System enables a full two-way communication. It turns your coffee machine into a communication platform.

With our reliable and easy-to-use coffee machines, we not only offer delicious coffee, but also an effortless coffee experience. Enjoy delicious coffee, anywhere and any time, hassle-freely.

Bean to Cup coffee

A true Italian style espresso-based wide range of coffees freshly made from the beans is available with our machine.

INTERACTIVE TOUCH SCREEN

The interactive and intuitive touch screen has been developed with the JAVA coffee machine user in mind, bringing convenience to consumers (end users) and operators. Java screen provides in all cases an attractive, coherent and frictionless human-machine for an outstanding experience and easy operation.

USER EXPERIENCE

The screen is designed to maximise the coffee experience, guiding the user through a visual and self-explanatory interface, whilst providing the means necessary to promote to and captivate the consumer.

CONTACT DETAILS

A MYRIAD OF
PAYMENT OPTIONS

Multimedia Touch Screen

The 27 inches multimedia screen is a simple solution to capture the attention of the impulse buyer, advertiser or message giver. Engage and inform your customers. The display is updated in a snap.

Attractive LED Features

Our lighting enhancement blends perfectly with your building design and acts as an inviting focal point. The consumer experience is further enhanced with a large open serving area and LED backlight option.

Different Payment Solutions

Java Vending is equipped to support various payment solutions including coins, bills and cashless (credit card, apple pay, etc...)

Automatic Cup/Lid Dispenser

Cup and lid drop automatically. Auto lifting door with sensor makes sure the end users take the coffee in a safer way.

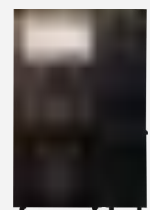

Easy to Clean and Maintain

Simple design and handling for maximum cleanliness. It is easy to care for and maintain which leads to more operational uptime.

Ice Maker Option

As ice drinks are becoming more popular, JAVA vending machine can be equipped with a ice maker and automatically dispense proper amount of ice according to the formulation.

Ice Maker

INTELLIGENT OPERATING SYSTEM

ECO-FRIENDLY

Our solutions are manufactured according to the eco-friendly and social responsibility principles. We improve organizations sustainability results by effectively reducing the amounts of waste currently produced by hot and cold beverage consumption.

We incorporate the most advanced energy-saving mode, saving up to 30% in energy consumption.

INFINITE POSSIBILITIES

Color & Design Customizing

We support customizing including changing the machine's appearance. Simply provide with your artwork to us, and we can manage to realize it. Your brand logo and your special design will show on the machine.

Easy Transportation

Separated parts packaging brings big convenience. You don't need to worry for the big size of packaging during transportation. Led light part and ice maker part of our machine can be separately packed.

Additional Revenue

With optional vending cabinet added, bottle beverages, food and snack selling can be connected to work together with our machine by sharing a same user interface. An additional revenue opportunity.

Vending Series

Desk Top Coffee Vending Machine

DELISSIMO WSD18-109

FEATURES

- Intelligent pre-brew aroma system
- A variety of drinks for options (14 types on screens)
- Freely change from fresh milk and powder milk
- Fault alarm system
- Input and output load detection
- Double boilers and double pumps

10.1 inch smart touch screen

Light weighted aluminum alloy frame shell

Food grade bean and powder canisters

Optional fresh milk system

Optional base cabinet

Optional multiple payment solutions

MAIN SPECIFICATION

Net Weight	AC Input Voltage	Rated Power	Boiler	Dimension
26kg	220-240VAC/50HZ 110-120VAC/60HZ	2200W/1250W	One thermo block and one water storage boiler	460*655*540mm

Vending Series
Ice Cube Maker

WSD18-201

FEATURES

- 10.1 inch smart touch screen, simple and convenient operation
- Adopting multiple water inlet methods for efficient, fast, and stable ice making
- Built in high-precision electronic weighing instrument for precise ice production
- Equipped with UV sterilization device, ensuring food safety

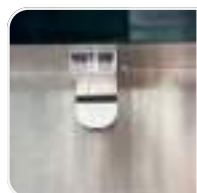

10.1 inch touch screen

Brushed stainless steel shell

Removable drip tray

Quick ice outlet

Able to produce cold water

Continuous ice making, efficient and energy-saving

MAIN SPECIFICATION

Net Weight	AC Input Voltage	Rated Power	Dimension
68kg	220VAC/50Hz	650W	420*620*750mm

Home & Office Series

Fully Auto Coffee Machine

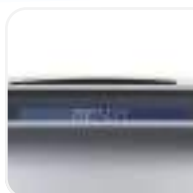

WSD18-060

FEATURES

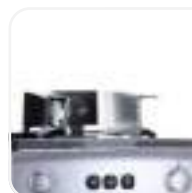

- 45° HD LCD screen
- Functional design makes operation easier
- Intelligent control system brings a humanized interactive experience
- Pre-brew aroma system makes richer crema
- Brand new light indicator system, silver classic design

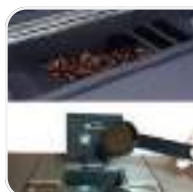

- One button start
- LCD screen
- Ten languages

Immediate stop while making coffee

Reinforced water tank cover and bean tank cover

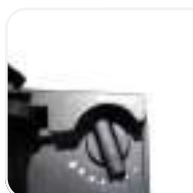

Both ok for fresh coffee bean or coffee powder

Automatic cleaning program

Adjustable outlet height for different size of cups

Six grinding levels

- Single/Double cups selection
- Flavors: mild/normal/strong
- Water volume from 30ml to 240ml

Detachable waste water tray and waste pod box

MAIN SPECIFICATION
